1 What We Did

An in-person public open house was held on February 19, 2026 for the Point Aux Pins Area Structure Plan (ASP) Amendment and Mirigal Neighbourhood Structure Plan (NSP). 130 notification letters were sent to landowners in the area, and advertisements were placed in the newspaper (Fort Saskatchewan Record) and virtual newsletter two weeks prior to the event – see Appendix C for Notification Information.

The open house was hosted at a meeting room located the City of Fort Saskatchewan's Dow Centennial Centre, where attendees could drop in between 5:00 pm to 8:30 pm. Presentation boards about the project were displayed throughout the meeting room venue, including background information, project timeline, site context, existing land use concept, and proposed draft land use concept for the ASP amendment, as well as land use designations and various maps (parks and open space, transportation, servicing, staging, etc.) for the NSP. The full set of presentation boards are included in Appendix A of this report.

Attendees had the opportunity to browse through the boards, provide feedback, and ask any questions to project staff who were present. For members of the public who were unable to attend the in-person open house, an online survey was made available for one week following the event to provide additional opportunity to contribute feedback. A QR code was available at the meeting for access to the survey.

2 What We Heard

2.1 Open House Feedback

A total of eight community members attended the open house, one of whom provided sticky note comments on the “Parks and Open Space” board for the NSP. The comments are summarized below:

- Existing residents feel that there will be inadequate parking stalls on the medium density residential site and on-street parking will overflow to the neighbouring community to the north.
- The proposed open space will provide opportunities for the proposed and surrounding community for walking and casual recreation use – places to walk are important especially if they are connected.
- Residential development in this area will drive the need for another school in the area – will it be needed at an earlier stage of development if it is funded by the Province?
- The road network design and how it is built over time should discourage shortcutting.
- A resident indicated that a solid wall is desired to visually block the Miragal development from the existing Point Aux Pins development to the west. Another resident suggested that pedestrian access to the stormwater management facility from the existing west Point Aux Pins development would be a benefit.

- A resident of the existing west Point Aux Pins development indicated that the creek is presently used for irrigation for some of the properties but indicated that drawing water from the creek was unreliable and seasonal at best.
- Commercial development should include local shopping opportunities, not all big box type of stores.
- The location of commercial and retail shopping takes advantage of highway exposure – need to consider safe access with traffic with traffic signals.
- Consider senior's housing due to lack of housing choice in the community.
- The open space seems to be well distributed around the neighbourhood – better to have more parks, even if they are smaller.
- Residential development should consider impacts on local traffic patterns including Wilshire Boulevard to the north.
- The tree stand is a good landmark in the community and should be kept even if is not in "perfect" condition. It may be a place to encourage bird nesting.
- Waterfowl land in the area during fall migration – the stormwater facility may attract more of these birds.
- Since the timing of development of the west parcel is unknown, the design of the west "triangle" lands should consider how the 2 development parcels will merge over time.

2.2 Online Survey Feedback

The online survey received two responses, which have been summarized below:

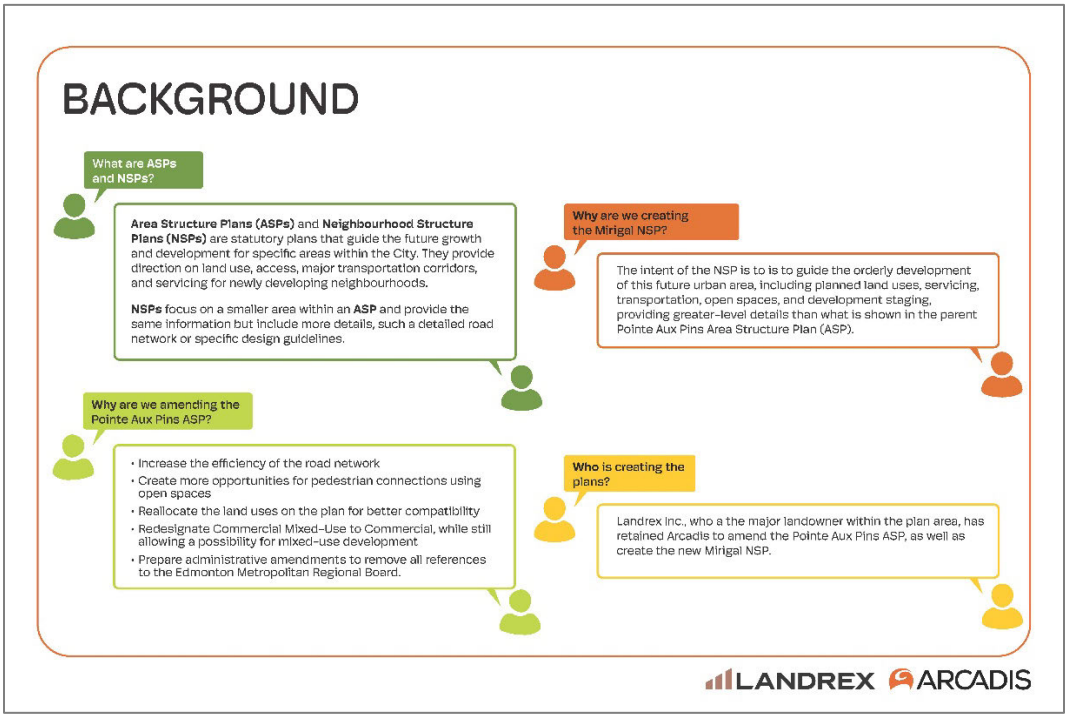

- Existing residents expressed concerns about density, construction nuisance including waste management, traffic noise and congestion, parking, view obstruction, and decline in property value
- To mitigate concerns, suggestions were made to move the medium density site on Wilshire Blvd to the centre of the new development plan or the other size, to widen Wilshire Blvd to two lanes, and to increase the size of roundabouts
- More routes that give access to Hwy 21 were seen as a favourable aspect about the ASP amendment, and there was anticipation about new development bringing in a new firehall
- There was a desire for more greenspace and ponds

3 Next Steps

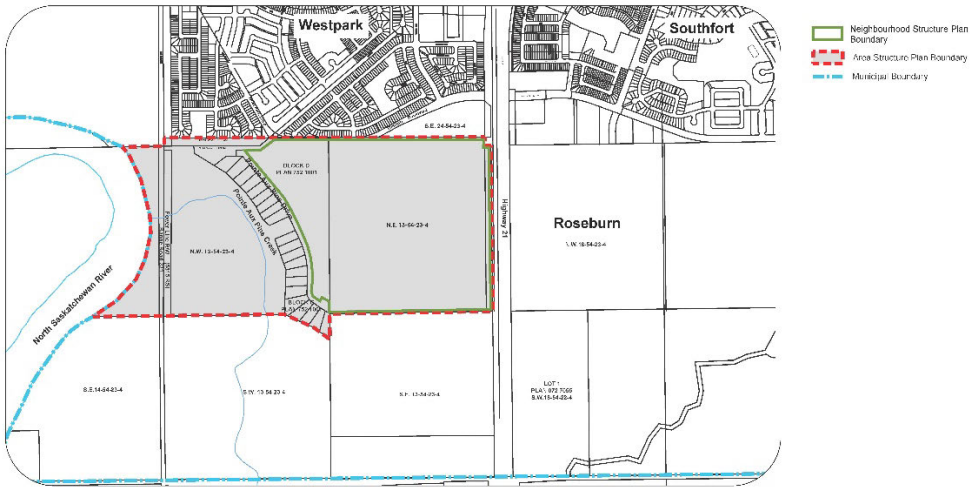

The feedback received from the open house and online surveys will be integrated in the next resubmission of the Point Aux Pins ASP amendment and Mirigal NSP. An additional open house may be held in Spring 2026, if required.

BACKGROUND
What are ASPs and NSPs?
Area Structure Plans (ASPs) and Neighbourhood Structure Plans (NSPs) are statutory plans that guide the future growth and development for specific areas within the City. They provide direction on land use, access, major transportation corridors, and servicing for newly developing neighbourhoods.
NSPs focus on a smaller area within an ASP and provide the same information but include more details, such a detailed road network or specific design guidelines.
Why are we creating the Mirigal NSP?
The intent of the NSP is to is to guide the orderly development of this future urban area, including planned land uses, servicing, transportation, open spaces, and development staging, providing greater-level details than what is shown in the parent Pointe Aux Pins Area Structure Plan (ASP).
Why are we amending the Pointe Aux Pins ASP?
• Increase the efficiency of the road network
• Create more opportunities for pedestrian connections using open spaces
• Reallocate the land uses on the plan for better compatibility
• Redesignate Commercial Mixed-Use to Commercial, while still allowing a possibility for mixed-use development
• Prepare administrative amendments to remove all references to the Edmonton Metropolitan Regional Board.
Who is creating the plans?
Landrex Inc., who a the major landowner within the plan area, has retained Arcadis to amend the Pointe Aux Pins ASP, as well as create the new Mirigal NSP.

LAND USE DESIGNATIONS

What They Mean

Low Density Residential

Low Density Residential includes single-family and semi-detached (duplexes) housing forms, and aims for a density of 25 du/ha.

Low/Medium Density Residential

Low/Medium Density Residential includes rear-access townhomes, and aims for a density of 45 units/ha.

Medium Density Residential

Medium Density Residential includes townhomes, stacked townhomes, and lor-rise apartments, aiming for a density of 65 units/ha.

Medium/High Density Residential

Medium/High Density Residential can include low-rise apartments or residential mixed-use developments if within Neighbourhood Node.

Residential Mixed-Use

This designation is a vertical or horizontal mix of residential, commercial, and office uses, and aims for a density of 70 units/ha.

Neighbourhood Node

The Node is the focal point of the neighbourhood that serves as a local destination. It includes housing options, community gathering spaces, and enhanced urban design features.

Commercial

Includes a variety of commercial opportunities, such as large or medium developments, strip malls, potential mixed-use buildings, or multi-storey commercial.

Municipal Reserve (MR)

This designation includes parks (including the existing tree stand), public outdoor recreation (multi-use trails, pedestrian corridors), and schools.

Appendix B: Responses (Sign-In, Survey Responses, Email Correspondence, Sounding Boards)

What did you like most about the proposed Pointe Aux Pins Area Structure Plan amendments?	Do you have any concerns about the proposed amendments in the Pointe Aux Pins Area Structure Plan?	What did you like most about the proposed Mirigal Neighbourhood Structure Plan?	Do you have any concerns about the proposed concept for the Mirigal Neighbourhood Structure Plan?	What concerns/feedback do you have about the future development of this area?	Do you have any other feedback?
We don't appreciate the land being developed.	We don't want the land to be developed. Property value will decrease, construction is never appreciated and the family hone we purchased with the beautiful view we appreciate everyday will be ruined. The road that is already busy and loud will become unbearable with the extra traffic. We are heartbroken this is being proposed.	We find this a challenge to answer since we don't want it to go ahead: having more green space and ponds are always appreciated	We don't want it to go ahead	The construction itself and how long it'll take. The devalue of our home. The extra traffic and congestion concerns us. The view we have and love now will be trashed	None
More routes to get access to highway 21.	Where the medium density is located on Wilshire boulevard we believe it shoukd be moved to the middle of the new development plan or the other side. Existing people living in the established neighborhood do not have a choice but people miving into the new area will they can live close or farther away from a denser location. Also, medium density meansmore parking and congestion issues for Wilshire boulevard. Most people as did we moved away from the higher density areas because of parking and crowding.	Hopefully this new development and the other across the highway will bring in the new firehall faster.	Wilshire boulevard should be widened to two lanes all the way down. Willow link is already getting congested with lots of throughput vehicles the medium density being beside Wilshire will make this worse.	Hopefully the developer and the builders will control the garbage from the development of this area so our existing area stay clean and don't have to pick up garbage in the yard and the street. In my experience cleanliness is not the case.	Make the round abouts larger so it isn't treated as a four way stop as the ones now are. There is not enough room for a vehicle to lead off and keep traffic flowing properly or just put in a four way stop.

NOTICE OF PUBLIC OPEN HOUSE

Time & Date: 5:30pm - 8:30pm, February 19, 2026

Location: Lion's Banquet Hall, DOW Centennial Centre
8700 84 St, Fort Saskatchewan, AB

Join us to learn about the proposed **Pointe Aux Pins Area Structure Plan (ASP)** amendments and the new **Mirigal Neighbourhood Structure Plan (NSP)**.
This is an opportunity for members of the public to ask questions and share feedback.

The project team will provide information on the proposed land uses, servicing, transportation network, phasing, and proposed amendments to the existing ASP. The project team will also provide anticipated project timelines, the process, and answer questions from the public.

This is a drop-in session for an opportunity for group or one-on-one discussions with the project team.

Click HERE for Open House materials and survey. Available on February 19, 2026!

Landowner Notification Letter

Arcadis Professional Services
(Canada) Inc.
10120 103 Avenue
Suite 300
Edmonton, Alberta T5J 3R6
Canada
Phone: 780 428 4000
www.arcadis.com

Date: February 5, 2025
Subject: Notification of the Proposed ASP and NSP Applications, and Invitation to the Public Open House

Dear Landowner,

We are writing to inform you about the Pointe Aux Pins Area Structure Plan (ASP) and the Mirigal Neighbourhood Structure Plan (NSP) applications that have been submitted to the City of Fort Saskatchewan. As a landowner within or adjacent to the plan area, your input is important to us, and we are committed to keeping you informed throughout this process.

Landrex Inc. has initiated the process of developing an NSP located within the southern portion of the City of Fort Saskatchewan. The proposed NSP will result in amendments to the existing Pointe Aux Pins ASP; however, the general intent of the plan will not change. See figures below for the location and boundary of the plans, and the proposed Land Use Concept for the Mirigal NSP.

We invite you to participate in an upcoming Public Open House to learn more about the project, ask questions, and provide your input on the proposed Land Use Concept for the NSP and ASP amendments. The project team will share details about the proposed land uses, infrastructure, road network, and phasing of future development.

Date & Time: *February 19, 2026, 5:30 PM – 8:30 PM*
Location: *Lion's Banquet Hall, DOW Centennial Centre - 8700 84 St Fort Saskatchewan, AB*
Format: *Informal drop-in, presentation boards*

The ASP and NSP materials can be found by scanning the QR code below, which will be available on February 19, 2026.

If you have questions, require additional information, or are unable to attend the Information Session, please do not hesitate to contact the undersigned.

Sincerely,
Arcadis Professional Services (Canada) Inc.
